

## Roles Partners Can Play in Joint Information Management

Roles that different players can have in collaborating on joint information management project:

- Maintaining data
- Providing data
- Giving feedback on community needs not met
- Creating information resources
- Making information and/or information resources available to others
- Using information
- Supporting others in using the information
- Promoting the resources, information and/or collaboration
- Developing the resources
- Continuing to improve local information
- Evaluation and assessment of usability and quality of information resources
- Administering an agreement to ensure the important activity areas are maintained
- Communication
- Other...

Each organization can specify who from its team will provide specific roles, how and with what resources.
